# DIFFERENCE

## MINS Ampoules, Serum, Toner & Disposable Mask

	Mins Ampoules	Serum	Toner	Disposable Mask
Concentration & Activity	Highly concentrated and very active, but the molecules are smaller, absorb quickly, and do not cause a burden on the skin. Suitable for sensitive skin.	Lower than ampoules, depending on skin condition, mostly are suitable for daily use.	Low.	Lower than ampoules, masks are also first aid products, but lower in nutrient content than ampoules.
Efficacy	Replenish skin nutrition, moisture, strengthen the skin's natural resistance, anti-aging and anti-wrinkle, whiten and remove spots, improve sensitive skin, improve acne and acne scars, accelerate cell repair and renewal, drive skin metabolism, and make skin brighter and firmer.	According to the essence ingredients, the effects include anti-aging, anti-wrinkle, moisturizing, whitening, freckles removal and so on.	It has a good secondary cleansing effect and quick hydration.	According to the composition of the mask, quickly replenish nutrients, moisture, deep repair, etc.
Usage	Use directly after cleansing.	Use after cleansing and toner.	Use after cleansing.	After cleansing, leave on for about 15 minutes, rinse and then apply normal basic skincare.
Suitable for everyday use	Suitable, small molecules, light and non-sticky, will not burden the skin.	Depending on the condition of the skin, use daily or every few days.	Suitable.	Not suitable, generally use two or three times a week, otherwise it will cause excessive nutrients and burden, results in damage to the skin.
Suitable skin type	Suitable for any skin type.	Depending on the effect of the serum, choose the right one carefully.	Suitable for any skin type.	Depending on the effectiveness of the mask, choose the right one carefully.
Storage	Aseptic packaging, one ampoules a day.	Usually, after use, you can close it tightly with the bottle cap.	Usually, after use, you can close it tightly with the bottle cap.	Aseptic packaging, single use.
